CJI Advocates for National Judicial Policy to Reduce Divergence

Published On: 27-11-2025

On Constitution Day, Chief Justice of India Surya Kant called for a uniform national judicial policy to promote predictability and coherence in judicial decisions across the Supreme Court and 25 High Courts.

Key Points:

- **Need for Uniformity:** Currently, multiple High Courts and Supreme Court Benches can lead to **divergent decisions** on similar issues, undermining legal clarity.
- **Judicial Symmetry:** Justice should be **consistent yet sensitive** to diverse languages and contexts, forming a "judicial symphony."
- **Access to Justice:** Barriers such as **cost, language, distance, and delay** prevent marginalized sections from obtaining justice, creating inequalities.
- **Judicial Infrastructure:** Strengthening courts and judicial processes is necessary for **effective justice delivery**.
- **Alternative Dispute Resolution:** Emphasised **mediation** as a **cost-effective, participatory, and humane method** for resolving disputes.

Significance:

- Promotes **coherence and predictability** in the Indian judicial system.
- Enhances **access to justice**, particularly for marginalized communities.
- Encourages adoption of **modern dispute resolution methods** to reduce burden on courts.
