Hical Gets Dassault Contract for Rafale Fighter Components

Published On: 13-03-2026

Why in News?

Hical Technologies has received a contract from Dassault Aviation.

The Bengaluru-based company will manufacture products for control system applications of the Dassault Rafale.

The development highlights the growing role of Indian aerospace manufacturing in the global defence supply chain.

Key Details:

Hical Technologies will produce critical components used in Rafale fighter aircraft control systems.

The agreement strengthens cooperation between Indian defence manufacturers and global aerospace companies.

Significance for India

The contract reflects India's increasing capability in precision engineering and aerospace manufacturing.

It supports the Make in India initiative in the defence sector.

The partnership shows global recognition of India's manufacturing and technological expertise.

About Rafale Fighter Aircraft

The Dassault Rafale is one of the world's most advanced multirole fighter jets.
