India, Sweden Reaffirm Commitment to Green Tech and R&D Cooperation Under India-EU FTA Framework

Published On: 21-02-2026

§Government of India and Sweden reaffirmed their commitment to strengthen cooperation in green technology and research & development (R&D).

Focus on Green Technology Cooperation

§Both countries agreed to work more closely in green tech and sustainable development.

§They see green innovation as a key area for future collaboration.

Research and Innovation Partnership

§India and Sweden will push for deeper cooperation in research and development.

§They want to combine India's skilled youth with Sweden's innovation capacity for joint progress.

Under the India-EU Free Trade Agreement Framework

§The commitment was made within the scope of the India-European Union Free Trade Agreement (India-EU FTA).

Why This Matters

The partnership strengthens economic and technology ties between India and Sweden.

It helps both countries work together on future-oriented technologies like clean energy and innovation.

In Simple Terms

§India and Sweden agreed to expand cooperation in environment-friendly tech and research under the framework of the new India-EU Free Trade Agreement.
