## River System of Goa – 2

### Chapora (Colval) River System:

- The **Colval River**, widely identified as **Chapora River**, originates in Maharashtra near the **Ramghat region**.
- The river enters Goa near **Ibrampur village** in the Pernem area.
- Tributaries including **Kalna stream** and Virnoda contribute to the **drainage network**.

### Southern Rivers of Goa:

- The **Sal River** emerges near Verna and flows parallel to the **Konkan coastline** before reaching Betul.
- Tributaries such as **Navelim stream** and Cuncolim drain

- The **Talpona River** originates in the Ambaghat region of **Canacona taluka**.
- Tributaries like **Gaondongri stream** and Bhatpal feed the **Talpona watershed**.
- The **Galjibag River** receives water from feeder streams such as **Mashe River** and Loliye.
- Originating in Karnataka's **Uttara Kannada district**, this river flows towards the **Poinguinim coast**.

### Smaller Coastal Rivers:

- The **Saleri River** originates within forest areas near **Quepem region** in southern

- Streams such as **Padi rivulet** and Agonda merge with the **Saleri channel**.
- The **Mandre River** begins near the forest zones of **Corgao village** in Pernem.
- The **Harmal River** originates in hilly terrain near Corgao and flows roughly **11 km** westward.
- The **Baga River** represents the **smallest river** in Goa's hydrological network.
- It originates near **Assagao hills** within the Bardez region before entering the **Arabian Sea**.

## Ojos del Salado

- **Nevado Ojos del Salado** is a **dormant complex volcano** located in the Andes on the **Argentina–Chile border**.
- It is the **highest volcano on Earth** and the **highest peak in Chile**, with a summit altitude of **6,893 metres (22,615 ft)** above sea level.
- The volcano consists of **overlapping lava domes, lava flows, and volcanic craters** covering an area of **70–160 square kilometres (27–62 mi<sup>2</sup>)**.
- The upper slopes have **sparse ice cover**, and the surrounding region is extremely **arid**, part **Diagonal**.
- The lake has a **diameter of about 100 metres (330 ft)** and is fed by **permafrost and snowfields**.
- Ojos del Salado was **volcanically active** during the **Pleistocene and Holocene**, producing mainly **lava flows** in two distinct phases.
- The **last confirmed eruption** occurred around **750 CE**, though **steam emissions in November 1993** may indicate minor activity.
- The first successful **ascent** was made in **1937** by Polish climbers **Jan Alfred Wojsznis**.
- There are **two summits**: the **eastern (Argentine)** and **western (Chilean) summit**, both on the international border.
- The mountain rises from the **southern end of Puna de Atacama**, a high plateau adjacent to the **Atacama Desert**, with an average elevation of **4,000 metres (13,000 ft)**.
- Ojos del Salado is often called **Cerro Ojos del Salado** (mountain) or **Nevado Ojos del Salado** (snowy mountain); the name may also mean “**salty**”.
