Pharmacopoeia Commission for Indian Medicine & Homoeopathy

Published On: 02-11-2022

Why is in news? A significant step taken to upgrade laboratory capacity for Quality Control of Traditional/Herbal Products in South East Asia Region

Pharmacopoeia Commission for Indian Medicine & Homoeopathy (PCIM&H), Ministry of Ayush in collaboration with WHO South East Asia Region (WHO-SEARO) has taken a **major stride to upgrade laboratory capacity for quality control of Tradition/Herbal products in South East Asia region.**

A 3-days training program was inaugurated, such a programme is taking place for the first time in the country.

Total of 23 participants from **9 countries** (Bhutan, Indonesia, India, Sri Lanka, Thailand, Nepal, Maldives, Timor Leste and Bangladesh) are participating in this training program.

The objective of the training is to **impart skills for laboratory based techniques and methods to maintain the quality of Traditional/herbal products.**

As per the **Research and Information System Centre for Developing Countries report**, the industry is projected to reach US\$ 23.3 billion in 2022.

With increasing market, the **quality issues of herbal material** is also becoming **increasingly worrying due to adulteration.**

The uniformity in **Lab-based Quality Control** will be able to evaluate quality of the herbals often altered by various physical, chemical, and geographical aspects.

Quality control measures includes standards for raw herbal material, good practices (including agricultural, cultivation, collection, storage, manufacturing, laboratory, and clinical, etc.).

Specified and uniform licensing schemes for manufacturing, import, export and marketing should be implemented that are pivotal to ensure safety and efficacy.

The growing market is giving the challenge to maintain the proper quality, efficacy and effectiveness of herbal drugs.

This needs to be strengthened through network of laboratory capacity for Quality Control of Traditional/Herbal Products.

This unique program will **provide hands-on training** on laboratory methods like Macroscopy, Microscopy in pharmacognosy, phytochemistry, Microbiology, other advanced instrument/technologies i.e. High-Performance Thin Layer Chromatography (HPTLC), Gas Chromatography etc for quality control of traditional/herbal Products.
