SpaceX Signs Major AI Deal with Anthropic for Access to ‘Colossus 1’ Supercomputer

Published On: 08-05-2026

SpaceX has signed a deal with Anthropic, allowing the AI company to use the powerful “Colossus 1” supercomputer for training and running its Claude AI models.

The deal highlights the growing global competition in artificial intelligence, where companies need massive computing power and advanced AI chips to develop next-generation AI systems.

Key Highlights:?

Anthropic will use Colossus 1 to improve and scale its Claude AI models.

Colossus 1 is one of the world’s largest AI supercomputers and reportedly uses over 220,000 NVIDIA GPUs.

The system is designed for large-scale AI training and high-speed data processing.

Reports say SpaceXAI has shifted some of its own AI work to newer infrastructure, making Colossus 1 available for Anthropic.

The partnership may also explore future space-based or orbital AI computing systems.

Important Terms:

GPU (Graphics Processing Unit): Specialized processor used for AI and machine learning tasks.

AI Supercomputer: High-performance system built to train and run AI models.

LLM (Large Language Model): AI model trained on massive text datasets.

AI Inference: Process where trained AI generates responses.

Phone: **044 4353 9988 / 98403 94477 / Whatsapp : 09710729833**

AI Safety: Ensuring AI systems operate responsibly and safely.

The agreement shows that computing infrastructure and AI chips are becoming as important as software in the global AI race.
