Surge of migratory birds at Sambhar Lake, Rajasthan

Published On: 02-11-2025

About Sambhar Lake:

Sambhar Lake, **India's largest saline wetland**, is located in the Nagaur and Jaipur districts of Rajasthan, bordered by the Aravalli hills. It is the source of most of Rajasthan's salt production.

It was designated a **Ramsar site** in 1990 due to its ecological significance.

It attracts thousands of migratory birds, including flamingos, from November to February. During the monsoon, the lake comes alive with birds like coots, black-winged stilts, sandpipers, and redshanks.
