

Suryastra Rocket System

Published On: 05-01-2026

- **Procurement Details:** The Indian Army signed a **293-crore** contract under **Emergency Procurement (EP)** powers with Pune-based **NIBE Ltd**, in collaboration with Israel's **Elbit Systems**.
- **Technical Specifications:**
- **Universal Launcher:** A multi-calibre system capable of firing different types of rockets.
- **Strike Range:** High-precision strikes up to **300 km**.
- **Accuracy:** It boasts a **Circular Error Probable (CEP)** of less than **5 metres**, meaning it is highly accurate over long distances.
- **Strategic Value:** It is India's first "Made in India" universal rocket launcher with this range. It fills a critical gap in the Army's **Long-Range Precision Fire (LRPF)** capability, essential for deterrence along the borders with China and Pakistan.
