Why is in news? LCA Tejas successfully test-fires indigenous ASTRA Beyond Visual Range air-to-air missile off Goa coast

Tejas, Light Combat Aircraft (LCA) LSP-7 **successfully fired the ASTRA** indigenous Beyond Visual Range (BVR) air-to-air missile off the coast of Goa on August 23, 2023. The missile release was successfully carried out from the aircraft at an altitude of about 20,000 ft.

## Tejas:

It is the lightest, smallest and tailless multi-role supersonic fighter aircraft in its class.

This aircraft is designed to carry a range of air-to-air, air-to-surface, precision-guided, weapons.

It has the air-to-air refuelling capability.

The maximum payload capacity of Tejas is 4000 kg.

Speed: Mach 1.8.

It is designed by Aeronautical Development Agency under the Department of Defence Research and Development.

It is manufactured by State-owned **Hindustan Aeronautics Limited** (HAL).

#### Variants of Tejas:

Tejas Trainer: 2-seater operational conversion trainer for training air force pilots.

LCA Navy: Twin- and single-seat carrier-capable for the Indian Navy.

LCA Tejas Navy MK2: This is phase 2 of the LCA Navy variant.

LCA Tejas Mk-1A: This is an improvement over the LCA Tejas Mk1 with a higher thrust engine.

### **ASTRA** missile:

It is an indigenous Beyond Visual Range (BVR) air-to-air missile.

It is to engage and **destroy highly maneuvering supersonic aerial targets**.

It is designed and developed by Defence Research and Development Laboratory (DRDL), Research Centre Imarat (RCI) and other laboratories of DRDO.

The indigenous Astra BVR firing from home grown Tejas fighters is a major step towards 'Aatmanirbhar Bharat'.
