Union Minister Jitin Prasada inaugurates STQC Lab Automation Portal, SATYA

Published On: 11-02-2026

Union Minister Jitin Prasada inaugurated the STQC Lab Automation Portal called **"SATYA."**

SATYA is a new online system that brings together the services of the Standardisation Testing and Quality Certification (STQC) Directorate into one digital platform

What STQC Does

STQC ensures the *quality, security, and reliability of electronic and information technology products and services in India.*

It is part of the government's efforts **to improve product testing and certification** so **that products are safe and trustworthy.**

Why SATYA Is Important

Easier Access

SATYA puts all STQC services in **one user-friendly online portal.**

This makes it **easier for people to use services without going to physical offices.**

Benefits for Many Users

Citizens, startups, industries, MSMEs (small businesses), and government departments can use the portal.

Faster and Predictable Services

The portal aims to give faster approvals and clear timelines for testing and certification.

It helps reduce delays and improves planning for businesses.

How It Helps the Country

The portal supports cybersecurity, data protection, and product quality.

It will contribute to building a trusted digital ecosystem.

It supports India's growth as a global technology and manufacturing hub.
