AboutWorld Happiness Index

- It is an annual report published by the Wellbeing Research Centre at the University of Oxford in partnership with Gallup, the United Nations Sustainable Development Solutions Network.
- The rankings are based on **people's self-assessed life evaluations**.
- It asks respondents to think of a ladder with the best possible life for them being a 10 and the worst being a zero.
- They are then asked to rate their current lives on that scale.
- The study considers 6 explanatory factors for happiness: social support, GDP per capita, health life expectancy, freedom, generosity, and perception of corruption.
