

# **Coal Production in the Country Crosses One Billion Tonnes Mark in a financial year**

Published On: 23-03-2025

## Context

Apart from China, India is the only country to cross the 1 billion tonnes mark in annual coal output.

#### Significance of this Milestone

Fostering Energy Security: Coal contributes approximately 55% of India's energy mix, and around 74% in electricity generation.

Powering economy: Increasing production will substitute imports, contributing in foreign exchange savings.

### **Key Reforms**

**Coal Mines (Special Provisions) CMSP Act- 2015** paved way for **commercial mining** of the coal mines by private entities.

Mines and Minerals (Development and Regulation) Amendment Act, 2021, allowed Composite Prospecting Licence-cum Mining Lease (PL-cum-ML) specifically for coal.

Integrated Coal Logistic Policy and Plan, 2024

PM Gati Shati-National Master Plan in coal sector

Mission Coking Coal

National Coal Index (NCI), etc.

FDI Policy: Allowing 100% FDI in coal mining under the automatic route has attracted global expertise and advanced technologies.

#### **Existing Challenges/Concern for Coal Sector**

Global Pushback against Coal: Developed countries are pushing for phasedown of coal production.

**Import dependence**: India imported about 260 million tonnes of coal in FY 2023-24, dominated by non-coking coal (~77% of total imports).

Other issues: Land acquisition, environmental degradation due to open cast mining, etc.
