Lake Kariba

Published On: 03-12-2022

Why is in news? Zambia govt to ration electricity supply to domestic consumers after drop in water levels of lake Kariba

The lake is **bordering between the Zambia and Zimbabwe.**

Water levels in the lake have fallen due to reduced inflows from the **Zambezi river** and its tributaries and heavy use by power generation companies in Zambia and Zimbabwe.

According to reports, Hydropower contributes more than 75 percent of Zambia's power generation.
